# BfS AutoStreamer - Liquid Fertiliser Applicator

The BfS AutoStream<sup>er</sup> is a 'Perfect Partner' for a **flow based** rate controller. To ensure the accurate application of liquid fertiliser the operator has only to enter the litres per hectare required, factor in the specific gravity (SG) and begin to apply. Changing the application rate is equally simple and undertaken from within the cab. The BfS AutoStream<sup>er</sup> is manufactured in chemical resistant, glass reinforced plastic and easily fitted to most boom sprayers.

## How does it work?

Using a clever quad-valve system the BfS AutoStreamer allows the operator to achieve, a ten-fold increase in flow rates from only a three-fold increase in pressure. As the liquid fertiliser enters the BfS AutoStreamer the flow is channelled into four individual outlets.

## BfS AutoStreamer Features:

- Accurate placement of liquid fertiliser
- Minimises overlaps
- Full rate applied right up to the crop edge
- Variable rate application "on-the-go"
- Reduced crop scorch
- Allows application under a wide range of weather conditions
- No contamination of ditches and watercourses
- Protects hedgerow plants
- Better Nitrogen Use Efficiency
- Simple to use

## Fitting

TeeJet / EF3 / Euro  
Agrifac  
Stabiliser band

## Part No.

NFB500001  
NFB500010  
NFB300004
